

Type 3005-1001 PA-EL2

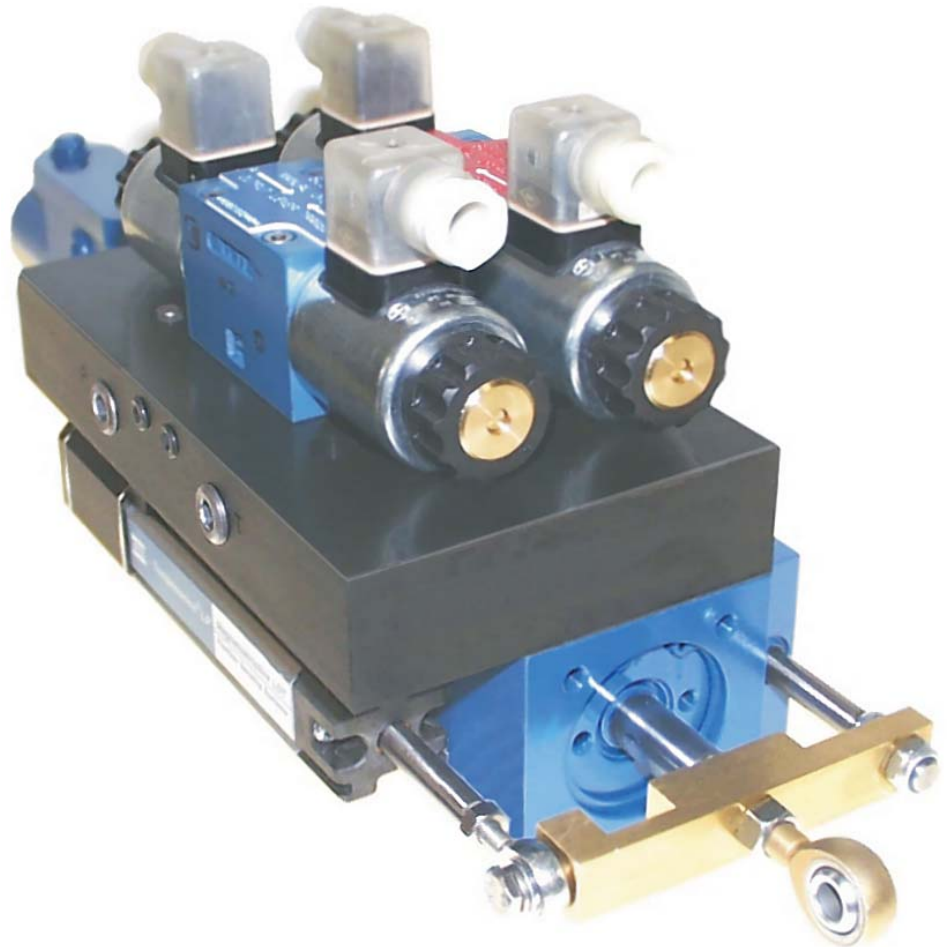

PITCH ACTUATOR WITH
LINEAR OUTPUT
AND REDUNDANT
SOLENOID VALVES
WITH MANUAL
OVERRIDES

The Type PA-EL2 Pitch Actuator is a modified version of the PMC PCA Series Pitch Controllers. Hundreds of PCA units are in use in CP propeller applications worldwide.

This PCA to PA-EL2 modification allows the existing pitch setting linkage and hydraulic pressure supply to be used on vessels that are upgrading to PMC's digital control system, D-MaC.

Independent left or right side connections are provided for oil pressure and drain to tank. The solenoid valve assembly can be mounted to protrude on the left or right side. Left side is illustrated.
