

Series 5040-2000

The Series 5040-2000 Remote Control Head is used with Series 8503-2000 Digital Servo Controllers in electric shaft systems. It can also be used with Type 8550-2000 MPC-D or Type 8550-3200 MPC-CP systems with a Type 5500-5900 Remote Lever Driver.

Moving the control lever at the station in control causes all other levers in the system to follow. This provides continuous alignment with the commanding lever position at all stations. Because all control levers are continually aligned, control transfer between stations is smooth and "bumpless".

FEATURES

- Twin screw control
- Dual potentiometers for redundancy
- Dimmable internal illumination
- Control head IP66 above console surface
- Corrosion resistant
- Rugged construction
- "Unbreakable" transparent cover
- Many different detent and friction arrangements
- Easy to install
- Removable terminal blocks
- Marine Approvals

OPTIONS

- Custom scales
- Many lever and handle options
- Two wire transmitters
- Switches

ELECTRIC SHAFT REMOTE CONTROL HEAD

TYPE MCH-ES2

PRIME MOVER CONTROLS INC.

SB 5040-2000

DIMENSIONS FOR 5040-2000 ELECTRIC SHAFT REMOTE CONTROL HEAD

SPECIFICATIONS:

Supply:

- Nominal 24 V_{DC}
- Nominal 500 mA, peak 1.5 A

Environmental:

- Operating temperature -25 to +70°C
- Storage temperature -40 to +85°C
- Vibration: Frequency range 2 to 100 Hz
Peak to peak amplitude 2 mm below 13.2 Hz
Acceleration amplitude 0.7 g above 13.2 Hz
- CE compliant for EMC (IEC/EN60945)

Physical:

- IP66 above console
- Optional mounting from bottom
- Dimensions:
150 mm L × 144 mm W × 361 mm H
(5.9" L × 5.7" W × 14.2" H)
- Weight, typical 5.1 kg (11.25 lbs)
- Removable terminal blocks for 14 to 20 AWG wires
